

RUDOLPH WYNTER

**President and COO
FERC regulated businesses
National Grid**

As President and COO of National Grid's FERC-regulated businesses, Rudolph Wynter has oversight of one of the largest electric transmission systems in the northeast, connecting thousands of communities and millions of customers to the energy that powers daily life and underpins regional economic vitality. As the role of the traditional energy company continues to evolve, developing innovative solutions that deliver customer value while enhancing safety and reliability are becoming increasingly important.

With oversight of National Grid's New Energy Solutions group, Mr. Wynter directs the identification, evaluation, development and deployment of new technologies and innovations for National Grid's regulated electricity businesses. This includes working with new partners that bring new perspectives and insights.

Mr. Wynter also is responsible for the company's generation fleet, which provides 4,000 megawatts of electricity to more than a million Long Island Power Authority (LIPA) customers.

Previously he was senior vice president of US Shared Services and during his more than 25-year tenure at National Grid and its legacy companies has held positions of responsibility in Customer

Operations, Strategic Planning, Engineering and Operations. He is a member of The American Society of Mechanical Engineers (ASME).
