

Jeffrey Logan

Jeffrey Logan has over 25 years of experience in energy policy analysis, low-carbon market development, energy security, and strategic planning. He has served as a thought-leader for clean energy policy approaches, a senior adviser on strategy, and a mentor for junior staff.

Over the past 10 years at the National Renewable Energy Laboratory (NREL), he has led innovative work on international power sector transformation, natural gas and renewable energy synergies, renewable energy policy design, and collaboration with key developing countries.

He currently manages the 21st Century Power Partnership, a key initiative under the Clean Energy Ministerial. He served as Special Advisor and Review Editor for the IPCC Special Report on Renewable Energy Sources and Climate Change Mitigation, published in 2011.

He had previous positions at the U.S. Congressional Research Service, the World Resources Institute, the International Energy Agency, and Pacific Northwest National Lab. Logan has served as an advisor to the World Bank, U.S. Environmental Protection Agency, and an assortment of utilities and policymakers around the world. He has published approximately 70 technical reports and journal articles, and testified to Congress 5 times. Logan spent 5 years living in Nepal, Mainland China and Taiwan, and has spoken around the world on energy and climate change topics.

Logan has undergraduate degrees in aerospace engineering and liberal arts from Pennsylvania State University, and graduate degrees in public administration and environmental science from Indiana University's School of Public and Environmental Affairs (SPEA).
