

BARRY CARR

Barry Carr is the Director of Business Development for ABMs' eMobility Group. In that role, he works with public and private fleets to procure, install, and maintain EV charging equipment. He is currently involved in multiple EV Charging Implementation projects, working with utilities, educational fleets, and government fleets to provide charging solutions.

Barry has been involved in the alternative-fuel vehicle industry for almost thirty years. He works closely with state and federal governments in support of funding and development programs and has worked with many advanced energy and alternative fuel companies in the role of project management, education/outreach, training, government relations, direct sales, and marketing.

As the Executive Director/Board chair of the United States Department of Energy's local Clean Cities Coalition, Barry works on an outreach program operated by the U.S.D.O.E. In that capacity he is in charge of educating transportation professionals on the use of alternative fuels and alternative fueled vehicles. Barry also serves on NGV America's Federal and State Legislative Committee and is vice chair of the Northeast Gas Association. He is also a member of the US DOE's Clean Cities Hall of Fame, and has authored several publications related to the alternative fueled vehicle industry.

Barry Carr holds a B.S. in Engineering Management from Clarkson University. He was elected to the United States Department of Energy's Clean Cities Hall of Fame.
