

KEITH SILLIMAN

Keith Silliman has extensive experience in energy project development, permitting and compliance, energy and environmental law and regulation, environmental impact assessment, agency consultation and stakeholder outreach. Keith's expertise is in facilitating a collaborative, consensus-based approach to decision making.

As part of his dedication to the environmental community, Keith is the chair of Alliance for Clean Energy New York (ACE NY), one of the most important and effective organizations in New York State. ACE NY promotes the use of clean, renewable electricity technologies and energy efficiency, and promotes boosting economic development, improvement of public health, and the reduction of air pollution. Keith is also Director of Regulatory Compliance for Cypress Creek Renewables.

Keith has unparalleled expertise in understanding and navigating the intricacies of the regulatory process and contractual requirements for developing complex energy and environmental projects in New York State. His entire career has focused on energy project development, permitting and impact assessment. He has worked on major hydropower, wind and solar projects as well as major gas and electric transmission facilities.

Keith Silliman holds a B.A from SUNY Albany, M.S. from SUNY ESF, and J.D. from Syracuse University College of Law.
